

EB-1975W

DATASHEET

WXGA resolution, 5,000 lumens of brightness and 3LCD technology help make the EB-1975W ideal for any meeting room.

The EB-1975W is a well-connected business projector, benefiting from a high brightness of 5,000 lumens and WXGA resolution. Epson's 3LCD technology provides high White and Colour Light Output for bright images and vivid colours, while Miracast and WiDi allow wireless screen-mirroring and easy streaming from a tablet or smartphone.

High quality

Professional environments are treated to presentations in more detail than ever before thanks to the EB-1975W's WXGA resolution, which fits the resolution and aspect ratio of most laptops. That detail shines through, even in daylight, thanks to 5,000 lumens brightness.

More vivid colours

Epson's own 3LCD technology ensures high-quality images with equally high White and Colour Light Output for vivid colours and bright images, even in daylight, and three times brighter colours than leading competitive projectors¹.

Easy to set up

Focus help, keystone correction and screen fit modes are included to ensure that set-up is simple, while flexible connectivity options include two HDMI ports, Wi-Fi and wired LAN.

Share content

With Miracast and WiDi, the EB-1975W can easily stream content from, and mirror the screen of, a range of smart devices, and is compatible with Epson's iProjection app². Content, such as a multi-source video conference and presentations, can be displayed in split-screen, while Multi-PC Projection software supports up to 50 PCs for collaboration in large meetings.

Built-in speakers

Epson recognises that video is being used more often within presentations, so as well as a high-resolution image, this business projector also includes built-in 16W speakers.
